

GROUNDS MAINTENANCE

Our New Normal - June 2020

YHG and Fix 360 have carried out a number of COVID-19 risk assessments in conjunction with our employees and Unite the union, so that we can make sure that everybody's health and safety is protected. We have shared the results of these risk assessments with our staff and to follow Government guidelines, the information below are the results of these assessments for our customers.

We will:

- Wear hi-visibility vests with social distancing messages printed on the back
- Wash our hands thoroughly and regularly and use alcohol-based hand sanitiser when soap and water isn't available
- Travel between sites in our own allocated vehicle - sharing vehicles or carrying passengers is not allowed
- Coordinate our attendance at sites whilst maintaining 2m social distancing at all times
- Wear enhanced PPE when appropriate. For example, some operations may require two peoples to complete (e.g. unloading machinery). When this happens, normal PPE with the addition of disposable mask and gloves will be worn in addition where the 2m social distance cannot be achieved
- Not share machinery. Where machinery is delivered to site, it will be unloaded by one person wearing disposable nitrile gloves. Upon return, it will be loaded again by person, wearing fresh disposable nitrile gloves and contact points wiped down.
- Avoid all contact with residents and passers-by whilst on site
- Be unable to accept refreshments from customers or shake hands with colleagues or customers

Please will you:

- Maintain a strict two-metre distance from our colleagues and contractors; they are following the social distancing guidelines outlined by the Government
- Not offer our colleagues any drinks or other refreshments as they are not able to accept these.
